

# ROSELAND COMMUNITY SPEAKER SERIES

## CLIMATE AND HUMAN MIGRATION

TUESDAY, NOVEMBER 21 - 7 P.M.  
ALL ARE WELCOME ~ FREE ADMISSION

**DR. ROBERT McLEMAN**

A former Canadian diplomat and award-winning teacher, Dr. McLeman studies how changes in the environment influence the well-being of households and communities.

His research projects have investigated historical drought-related migration on the Great Plains, adaptation to climate change in remote and resource-dependent communities, drivers of modern-day settlement abandonment, and the effects of environmental events and conditions in Africa, Asia and the Caribbean on international migration to Canada.

Port Nelson United Church, the Roseland Community Organization and the Roseland Park Country Club have collaborated on this new speaker series highlighting issues of interest and concern to residents of the Roseland neighbourhood and the wider Burlington community. This series presents different perspectives about issues, policies, local implementation and constraints to action.

**All events held at Port Nelson United Church, 3132 South Drive, Burlington.**
